

PCE Powder Polycarboxylate Superplasticizer

PCE Powder Polycarboxylate Superplasticizer is spray dried powder based on polycarboxylic ether. It belongs to polycarboxylate-based grafted copolymer superplasticizer, and is a new generation of environment friendly concrete admixture.

Application area

1. PCE Powder Polycarboxylate Superplasticizer is applicable to various ready mix concrete, precast concrete, wet mix mortar and especially dry mix mortar. It can also be used for oil well cementing operation.
2. PCE Powder Polycarboxylate Superplasticizer is particularly applicable to various construction works with high performance requirements for the concrete, such as water industry, marine works, seaports, traffics, electric powers etc.
3. PCE Powder Polycarboxylate Superplasticizer is applicable to the special concrete, such as high strength, high durability, self-compacting concrete.

Advantages:

1. To obtain a high quality concrete mix with accelerated strength development and extended workability without delayed setting characteristics.

2.To provide a concrete mix with exceptional placing characteristics and accelerated cement hydration for early strength development and high quality concrete.

3.To provide improved durability by increasing ultimate strengths and reducing concrete

Packaging:

Packed in 25kg plastic woven bags with PE inner liner , 13MT with pallets loaded in one 20'GP
