Mortar admixture superplasticizer

Profile

Mortar admixture superplasticizer is the wooden calcium represented by the common water reducing agent and represented by naphthalene series high efficient water reducing agent was developed after the third generation of high performance water reducing agent, Mortar admixture superplasticizer is made by a new process of powder poly carboxylic acid high performance water reducing agent, its excellent comprehensive index, green pollution-free, is a kind of high performance and environmentally friendly products. This product conforms to gb8076-2008 national standard high performance water reducer index.

product performance

Item	Unit	Standard
Appearance	/	White or light yellow powder
Density	kg/m³	500 ± 50
pH (23°C)	/	5.0 ± 7.0
Solid Content	%	97.0 ± 1.0
Moisture content	%	≤ 3.0
